

Tennessee Crop Weather

Tennessee Field Office • PO Box 41505 • Nashville, TN 37204 • (615) 781-5300 • www.nass.usda.gov

Issued Monday 3:00 PM; April 24, 2017

For the Week Ending April 23, 2017

RAINS HALT FIELD WORK

Rains, sometimes heavy, brought most field work to a standstill. A few isolated cases of flooding were reported with newly planted crops sustaining some damage. Strawberry harvest was also adversely affected. The state’s wheat crop continued to look good. Pasture condition improved with the added moisture. There were 3.4 days suitable for field work. Topsoil moisture was 4 percent short, 64 percent adequate, and 32 percent surplus. Subsoil moisture levels were 8 percent short, 73 percent adequate, and 19 percent surplus.

County Agent Comments

CROP PROGRESS					CONDITION					
Crop	This Week	Last Week	2016	5 Year Avg.	Item	Very Poor	Poor	Fair	Good	Excellent
Percent					Percent					
Corn – Planted	45	24	61	46	Winter Wheat	2	9	26	53	10
Corn – Emerged	21	N/A	13	18	Apples	0	2	31	65	2
Cotton – Planted	3	0	1	1	Pasture	2	16	36	38	8
Soybeans – Planted	4	N/A	2	1	Strawberries	1	5	38	50	6
Apples – Full Bloom	84	76	86	77						
Winter Wheat – Jointing	94	88	86	82						
Winter Wheat – Headed	60	34	22	28						

Scattered showers throughout the week have had producers searching for dry fields to continue with corn planting. Wheat continues to progress well.
Tim Campbell, Dyer County

Wheat is drying down and the majority of corn planting has been completed. Producers will resume planting as soils dry down the later part of the week. Cattle and pastures are in excellent condition.
J. C. Dupree, Lauderdale County

The farmers in Fayette County are waiting for dry conditions. Most fields are saturated. When conditions allow, farmers will start planting corn, beans and cotton.
Jeff Via, Fayette County

Producers worked around showers and thunderstorms early in the week to apply fungicides to the pollinating wheat crop. A few additional acres of corn were planted as well. Corn is emerging quickly due to warm soil temperatures. Mid and late week thunderstorms brought fieldwork to a halt.
Jeff Lannom, Weakley County

Flood waters of the Duck River over the weekend have at least 200 acres of soybeans underwater. Crop planting will be delayed now in the bottom areas.
Troy Dugger, Hickman County

Corn planting was in full swing until the heavy rains brought all field work to a halt by week’s end. Strawberries and some cool season vegetables are beginning to be picked.
Calvin C. Bryant III, Lawrence County

Rain was needed and rain is what we got. Areas of the county received anywhere from 3 inches to 6+ inches over the last few days. There have been some spotty areas of lodging in wheat and alfalfa stands. Pastures and crop fields are extremely soft and muddy so will delay fertilizing, spraying and planting activities for a few days.
Matt Webb, Marshall County

We had over 3 inches of rain last week which were much needed. We were very dry. Grass looks better already and ground will have enough moisture to get back to planting. Apples are late blooming due to the weather last winter.
Larry Moorehead, Moore County

Strawberry harvest underway. Rainy, cool, cloudy conditions are affecting fruit and harvesting of the fruit.
Bob Ary, Sumner County

Giles County has missed the rains that have come through Tennessee lately. Most corn producers have stopped planting due to hard, dry ground. Some wheat hay beginning to be harvested. **Kevin Rose, Giles County**

Rain this week has slowed field work. Pastures continue to green-up. Cattle in good condition. **A. Ruth Correll, Wilson County**

Corn and soybean planting as well as fungicide application on wheat has been delayed due to frequent rain showers. A few days without rain forecast for next week should allow some fields to dry and planting to resume. Cool season grass pastures look good and a few warm season grass pastures have been planted. All in all, just a bit too wet down here, but we're in good shape. You all have a great week. **Matthew Diest, Marion County**

Showers moved in at the beginning of the week with heavy rains at weeks end producing 2.75 to 4.3 inches of rain to keep field activities to a minimum for the week. Temperatures remain seasonable to above average. About two-thirds of the corn is planted with a third up. The wheat crop is fully headed. About half of the cotton is planted. Pastures continue to improve with moisture. Cool season hay appears to be short. **Ed Burns, Franklin County**

Wheat heading out now. .75 inch of rain this week has stopped corn planting. Lots of mouse-ear chickweed this year. **John Goddard, Loudon County**
